Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics)

Kendall Atkinson, Weimin Han

This textbook prepares graduate students for research in numerical analysis/computational mathematics by giving to them a mathematical framework embedded in functional analysis and focused on numerical analysis. This helps the student to move rapidly into a research program. The text covers basic results of functional analysis, approximation theory, Fourier analysis and wavelets, iteration methods for nonlinear equations, finite difference methods, Sobolev spaces and weak formulations of boundary value problems, finite element methods, elliptic variational inequalities and their numerical solution, numerical methods for solving integral equations of the second kind, and boundary integral equations for planar regions. The presentation of each topic is meant to be an introduction with certain degree of depth. Comprehensive references on a particular topic are listed at the end of each chapter for further reading and study.

Because of the relevance in solving real world problems, multivariable polynomials are playing an ever more important role in research and applications. In this third edition, a new chapter on this topic has been included and some major changes are made on two chapters from the previous edition. In addition, there are numerous minor changes throughout the entire text and new exercises are added.

Review of earlier edition:

"...the book is clearly written, quite pleasant to read, and contains a lot of important material; and the authors have done an excellent job at balancing theoretical developments, interesting examples and exercises, numerical experiments, and bibliographical references."

R. Glowinski, SIAM Review, 2003

From reader reviews:

Richard Tipton:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to find out everything in the world. Each book has different aim as well as goal; it means that book has different type. Some people sense enjoy to spend their time for you to read a book. They can be reading whatever they consider because their hobby will be reading a book. What about the person who don't like examining a book? Sometime, particular person feel need book if they found difficult problem or even exercise. Well, probably you'll have this Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics).

Clifford Harris:

The book Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics)? Several of you have a different opinion about guide. But one aim which book can give many data for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or facts that you take for that, it is possible to give for each other; you can share all of these. Book Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics) has simple shape however, you know: it has great and massive function for you. You can seem the enormous world by open up and read a e-book. So it is very wonderful.

Carolyn Charles:

Now a day individuals who Living in the era everywhere everything reachable by connect to the internet and the resources inside can be true or not call for people to be aware of each details they get. How individuals to be smart in acquiring any information nowadays? Of course the answer is reading a book. Studying a book can help men and women out of this uncertainty Information specially this Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics) book since this book offers you rich data and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you probably know this.

Drew Dube:

Reading a reserve tends to be new life style in this era globalization. With reading through you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. Many author can inspire all their reader with their story as well as their experience. Not only the story that share in the books. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors nowadays always try to improve

their ability in writing, they also doing some exploration before they write with their book. One of them is this Theoretical Numerical Analysis: A Functional Analysis Framework (Texts in Applied Mathematics).
