FST TCS 2000: Foundations of Software Technology and Theoretical Science: 20th Conference, New Delhi, India, December13-15, 2000 Proceedings (Lecture Notes in Computer Science)

The Foundations of Software Technology and Theoretical Computer Science conference (FST TCS) is a well-established annual event in the theoretical computer science community. The conference provides a forum for researchers to present interesting new results in several areas of theoretical computer science. The conference is now in its twentieth year and has continued to attract high-quality submissions and reputed invited speakers. This year's conference attracted 141 submissions (of which 5 were withdrawn) from over 25 countries. Each submission was reviewed by at least three referees, with most receiving more than four reviews. The Program Committee met in New Delhi on 5 and 6 August 2000, with many members participating electronically over the Internet. The discussions continued over the Internet for several days and we finally selected 36 papers for presentation at the conference and inclusion in the proceedings. We thank the Program Committee for their - perulative e?orts in ?nding top quality reviewers and working extremely hard to ensure the quality of the conference. We also thank all our reviewers for providing detailed and informative feedback about the papers. Rich Gerber's START program greatly simplified managing the submissions and the PC work. We are grateful to our six invited speakers, Peter Buneman, Bernard Chazelle, Allen Emerson, Martin Gr?otschel, Jos?e Meseguer, and Philip Wadler for agreeing to speak at the conference and for providing written contributions that are included in the proceedings. With the main conference this year, there are two satellite workshops - on Recent Advances in Programming Languages and on Computational Geometry.

From reader reviews:

John Whetstone:

Do you have favorite book? If you have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each guide has different aim or goal; it means that guide has different type. Some people truly feel enjoy to spend their time to read a book. They can be reading whatever they take because their hobby is usually reading a book. What about the person who don't like reading through a book? Sometime, man feel need book after they found difficult problem as well as exercise. Well, probably you will require this FST TCS 2000: Foundations of Software Technology and Theoretical Science: 20th Conference, New Delhi, India, December13-15, 2000 Proceedings (Lecture Notes in Computer Science).

Carrie Hunter:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their spare time with their family, or their very own friends. Usually they performing activity like watching television, gonna beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your free time/ holiday? May be reading a book is usually option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of e-book that you should read. If you want to try look for book, may be the book untitled FST TCS 2000: Foundations of Software Technology and Theoretical Science: 20th Conference, New Delhi, India, December13-15, 2000 Proceedings (Lecture Notes in Computer Science) can be fine book to read. May be it is usually best activity to you.

Jill Williams:

Playing with family within a park, coming to see the water world or hanging out with pals is thing that usually you have done when you have spare time, subsequently why you don't try factor that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love FST TCS 2000: Foundations of Software Technology and Theoretical Science: 20th Conference, New Delhi, India, December13-15, 2000 Proceedings (Lecture Notes in Computer Science), you are able to enjoy both. It is very good combination right, you still wish to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people. What? Still don't get it, oh come on its identified as reading friends.

Marina Tucker:

As we know that book is essential thing to add our expertise for everything. By a book we can know everything we would like. A book is a group of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This book FST TCS 2000: Foundations of Software Technology and Theoretical Science: 20th Conference, New Delhi, India, December13-15, 2000 Proceedings (Lecture Notes in Computer Science) was filled with regards to science. Spend your extra time to add your knowledge about your

technology competence. Some people has diverse feel when they reading the book. If you know how big benefit from a book, you can truly feel enjoy to read a guide. In the modern era like right now, many ways to get book that you simply wanted.
