The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics)

Joseph H. Silverman

The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) Joseph H. Silverman
The theory of elliptic curves is distinguished by its long history and by the diversity of the methods that have been used in its study. This book treats the arithmetic approach in its modern formulation, through the use of basic algebraic number theory and algebraic geometry. Following a brief discussion of the necessary algebro-geometric results, the book proceeds with an exposition of the geometry and the formal group of elliptic curves, elliptic curves over finite fields, the complex numbers, local fields, and global fields. Final chapters deal with integral and rational points, including Siegels theorem and explicit computations for the curve $Y = X + DX$, while three appendices conclude the whole: Elliptic Curves in Characteristics 2 and 3, Group Cohomology, and an overview of more advanced topics.

From reader reviews:

Ruth Mahan:

As people who live in often the modest era should be up-date about what going on or details even knowledge to make these keep up with the era which can be always change and advance. Some of you maybe will update themselves by studying books. It is a good choice for you but the problems coming to you is you don't know what one you should start with. This The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Ollie Waymire:

Reading can called head hangout, why? Because when you are reading a book specially book entitled The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) your thoughts will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely will become your mind friends. Imaging just about every word written in a book then become one type conclusion and explanation which maybe you never get before. The The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) giving you a different experience more than blown away your mind but also giving you useful facts for your better life in this era. So now let us show you the relaxing pattern at this point is your body and mind is going to be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary spending spare time activity?

Kim Phillips:

In this era globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. The actual book that recommended to you is The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics) this publication consist a lot of the information from the condition of this world now. This book was represented how can the world has grown up. The vocabulary styles that writer use to explain it is easy to understand. The writer made some research when he makes this book. Honestly, that is why this book appropriate all of you.

Debra Capone:

Within this era which is the greater particular person or who has ability in doing something more are more valuable than other. Do you want to become considered one of it? It is just simple approach to have that. What you should do is just spending your time little but quite enough to enjoy a look at some books. Among the books in the top checklist in your reading list will be The Arithmetic of Elliptic Curves (Graduate Texts in Mathematics). This book and that is qualified as The Hungry Hillsides can get you closer in becoming precious person. By looking upward and review this book you can get many advantages.
