Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology)

Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology)

Modularity—the attempt to understand systems as integrations of partially independent and interacting units—is today a dominant theme in the life sciences, cognitive science, and computer science. The concept goes back at least implicitly to the Scientific (or Copernican) Revolution, and can be found behind later theories of phrenology, physiology, and genetics; moreover, art, engineering, and mathematics rely on modular design principles. This collection broadens the scientific discussion of modularity by bringing together experts from a variety of disciplines, including artificial life, cognitive science, economics, evolutionary computation, developmental and evolutionary biology, linguistics, mathematics, morphology, paleontology, physics, theoretical chemistry, philosophy, and the arts.

The contributors debate and compare the uses of modularity, discussing the different disciplinary contexts of "modular thinking" in general (including hierarchical organization, near-decomposability, quasi-independence, and recursion) or of more specialized concepts (including character complex, gene family, encapsulation, and mosaic evolution); what modules are, why and how they develop and evolve, and the implication for the research agenda in the disciplines involved; and how to bring about useful cross-disciplinary knowledge transfer on the topic. The book includes a foreword by the late Herbert A. Simon addressing the role of near-decomposability in understanding complex systems.

From reader reviews:

Erica Clark:

What do you think of book? It is just for students as they are still students or this for all people in the world, what the best subject for that? Merely you can be answered for that concern above. Every person has different personality and hobby for every other. Don't to be forced someone or something that they don't desire do that. You must know how great in addition to important the book Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology). All type of book are you able to see on many options. You can look for the internet sources or other social media.

Hugo Mann:

Book is to be different for each grade. Book for children till adult are different content. To be sure that book is very important usually. The book Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) ended up being making you to know about other expertise and of course you can take more information. It is quite advantages for you. The publication Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) is not only giving you much more new information but also to be your friend when you experience bored. You can spend your own personal spend time to read your guide. Try to make relationship using the book Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology). You never experience lose out for everything if you read some books.

Katrina Varga:

Nowadays reading books be than want or need but also get a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge the actual information inside the book this improve your knowledge and information. The data you get based on what kind of book you read, if you want send more knowledge just go with knowledge books but if you want sense happy read one using theme for entertaining for instance comic or novel. The Modularity: Understanding the Development and Evolution of Natural Complex Systems (Vienna Series in Theoretical Biology) is kind of e-book which is giving the reader erratic experience.

Cynthia Haynes:

Spent a free time and energy to be fun activity to do! A lot of people spent their down time with their family, or their very own friends. Usually they doing activity like watching television, going to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Would you like to something different to fill your personal free time/ holiday? May be reading a book can be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to try look for book, may be the e-book untitled Modularity: Understanding the Development and Evolution of

Natural Complex Systems (Vienna Series in Theoretical Biology) can be very good book to read. May be it may be best activity to you.
