"Once again Brian has outdone himself. As a writer, I tend to be very critical of all technical publications, including my own . . . and it is such a pleasure to read anything Brian writes because he studies his topics well, resulting in an accurate, thorough, yet concise piece of work. ClickOnce being a new technology that deals with the pains we all have with application deployment, versioning, and security, it is important to have a text that will guide you through the learning process, give you sound advice for adopting the technology, and explain why you should even care. Brian gives his readers all of that."
—**Michele Leroux Bustamante,** *chief architect, IDesign, Microsoft Regional Director*

However, it is an even better investment by virtue of thefact that ClickOnce is a core part of the .NET Framework for Windows Forms2.0 now, and Windows Presentation Foundation in the future."
