Chemistry John A. Olmsted, Gregory M. Williams

100% Pure Chemical Understanding Every morning many of us are energized by a cup of coffee. Imagine if you were as energized by understanding the chemistry in your morning cup--from the coffee trees, which fill red coffee berries with caffeine and a variety of other chemical substances, to the feathery crystals formed by the caffeine molecules, to the decaffeinating machines, which use liquid solvents to remove this stimulant from some of the beans. Now, that's real chemical understanding! Olmsted and Williams' Fourth Edition of Chemistry focuses on helping you see and think about the world (and even your coffee) as a chemist. This text helps you understand how chemical phenomena are governed by what happens at the molecular level, apply critical thinking skills to chemical concepts and problems, and master the basic mathematical techniques needed for quantitative reasoning. You'll see the world as chemists do, and learn to appreciate the chemical processes all around us. A Fourth Edition with a lot of new perks! Revisions include a new, early energy chapter; revised coverage of bonding; expanded coverage of intermolecular forces; and increased coverage of multiple equilibria, including polyprotic acids. New pedagogy strengthens students' critical thinking and problem-solving skills. Visual Summaries at the end of each chapter use molecular and diagrammatic visual elements to summarize essential skills, concepts, equations, and terms. eGrade Plus provides an integrated suite of teaching and learning resources, including a complete online version of the text, links between problems and relevant sections in the online text, practice quizzes, the Visual Tutor, Interactive LearningWare problems, and lab demos, as well as homework management and presentation features for instructors.

From reader reviews:

Beverly Dewitt:

The book Chemistry can give more knowledge and information about everything you want. Why then must we leave the great thing like a book Chemistry? A few of you have a different opinion about book. But one aim this book can give many info for us. It is absolutely right. Right now, try to closer with the book. Knowledge or info that you take for that, you can give for each other; you can share all of these. Book Chemistry has simple shape but you know: it has great and big function for you. You can look the enormous world by available and read a book. So it is very wonderful.

Robert Maselli:

Playing with family in a very park, coming to see the water world or hanging out with pals is thing that usually you may have done when you have spare time, in that case why you don't try thing that really opposite from that. One activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Chemistry, you may enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh come on its mind hangout guys. What? Still don't get it, oh come on its named reading friends.

Evan Miller:

The book untitled Chemistry contain a lot of information on that. The writer explains your girlfriend idea with easy technique. The language is very clear to see all the people, so do certainly not worry, you can easy to read the idea. The book was published by famous author. The author will bring you in the new time of literary works. You can read this book because you can keep reading your smart phone, or program, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official web-site and order it. Have a nice go through.

Na Urquhart:

As a university student exactly feel bored to reading. If their teacher requested them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Chemistry can make you truly feel more interested to read.
