Rescue Pilot : Life-Saving At-Sea Navy Helicopter Missions Dan McKinnon

'Dan McKinnon, extraordinary helicopter pilot, brings alive the excitement and occasional terror of rescue at sea. An exciting hair raising and reverting tale of the largely untold story of helicopter rescues at sea' - Neil Armstrong, Astronaut. 'Just Great. It's going to be of tremendous interest to all naval helicopter pilots present and future and to the people who want to know more about this aspect of military flight. Boy, you've unleashed a flood of memories' - Bill Stuyvesant, legendary navy helo pilot. A daring Cold-War warrior recounts the thrills of high-sea helicopter rescue missions. Within the pages of "Rescue Pilot" distinguished naval aviator Dan McKinnon brings to life the dramatic at - sea helicopter rescues he participated in during his anything but peaceful 'peacetime service' in the United States Navy from 1956 to 1959. Helicopter flight itself, not to mention vertical-lift rescue and evacuation was in its infancy at that time, so pilots like Dan had to 'learn as they go', executing daring at-sea rescue missions from air carrier flight decks. Rough water, treacherous weather and risky cold-war conditions were all part of a day's work. Along with dramatic rescues, you'll participate in ship-to-ship replenishments, pick-ups and transfers, mine detection, and radar calibration operations. Dan also provides fascinating insider glimpses of peacetime naval life, long periods at sea, survival training, early helicopter technology, flight deck operation, and an incident-by-incident account of the U.S. Navy's involvement in the Formosa Strait crisis. In "Rescue Pilot" Dan McKinnon skillfully interweaves technical and historical information with his own thrilling real-life experiences ...and tells a story as only a man who has put his life on the line to save others can.
