IN SEARCH OF GOD is the only book designed specifically to move students into a true philosophical position of unknowing, not just abstractly, but by using a hands-on, practical method the author has developed over many years of teaching. Thus, the book is designed not to present reason and argument for one side and then the other, so that students can then just make up their minds and then go cheer for their side, but to use reason and argument to guide students to a center from whose unprejudiced and open-minded vantage point they are ready to engage and do philosophy.
