## **Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages** Marcus Wohlsen

Bill Gates recently told Wired that if he were a teenager today, he would be hacking biology. "If you want to change the world in some big way," he says, "that's where you should start-biological molecules."

The most disruptive force on the planet resides in DNA. Biotech companies and academic researchers are just beginning to unlock the potential of piecing together life from scratch. Champions of synthetic biology believe that turning genetic code into Lego-like blocks to build never-before-seen organisms could solve the thorniest challenges in medicine, energy, and environmental protection. But as the hackers who cracked open the potential of the personal computer and the Internet proved, the most revolutionary discoveries often emerge from out-of-the-way places, forged by brilliant outsiders with few resources besides boundless energy and great ideas.

In *Biopunk*, Marcus Wohlsen chronicles a growing community of DIY scientists working outside the walls of corporations and universities who are committed to democratizing DNA the way the Internet did information. The "biohacking" movement, now in its early, heady days, aims to unleash an outbreak of genetically modified innovation by making the tools and techniques of biotechnology accessible to everyone. Borrowing their idealism from the worlds of open-source software, artisanal food, Internet startups, and the Peace Corps, biopunks are devoted advocates for open-sourcing the basic code of life. They believe in the power of individuals with access to DNA to solve the world's biggest problems.

You'll meet a new breed of hackers who aren't afraid to get their hands wet, from entrepreneurs who aim to bring DNA-based medical tools to the poorest of the poor to a curious tinkerer who believes a tub of yogurt and a jellyfish gene could protect the world's food supply. These biohackers include:

- A duo who started a cancer drug company in their kitchen
- A team who built an open-source DNA copy machine
- A woman who developed a genetic test in her apartment for a deadly disease that had stricken her family

Along with the potential of citizen science to bring about disruptive change, Wohlsen explores the risks of DIY bioterrorism, the possibility of genetic engineering experiments gone awry, and whether the ability to design life from scratch on a laptop might come sooner than we think.

### **From reader reviews:**

#### **Paul Hill:**

Here thing why that Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages are different and trustworthy to be yours. First of all looking at a book is good but it really depends in the content of computer which is the content is as yummy as food or not. Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages giving you information deeper since different ways, you can find any publication out there but there is no reserve that similar with Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages. It gives you thrill examining journey, its open up your own personal eyes about the thing this happened in the world which is probably can be happened around you. You can actually bring everywhere like in park your car, café, or even in your technique home by train. Should you be having difficulties in bringing the paper book maybe the form of Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages in e-book can be your alternate.

#### **Jennifer Bell:**

Playing with family in a very park, coming to see the water world or hanging out with close friends is thing that usually you may have done when you have spare time, after that why you don't try point that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages, you are able to enjoy both. It is fine combination right, you still desire to miss it? What kind of hang-out type is it? Oh seriously its mind hangout men. What? Still don't buy it, oh come on its referred to as reading friends.

#### **Jason Braden:**

A lot of publication has printed but it differs from the others. You can get it by web on social media. You can choose the most effective book for you, science, witty, novel, or whatever by searching from it. It is named of book Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages. You can include your knowledge by it. Without leaving the printed book, it can add your knowledge and make you actually happier to read. It is most critical that, you must aware about book. It can bring you from one location to other place.

#### **Sandra Easley:**

Guide is one of source of information. We can add our information from it. Not only for students but additionally native or citizen need book to know the revise information of year to year. As we know those textbooks have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book Biopunk: Solving Biotech's Biggest Problems in Kitchens and Garages we can get more advantage. Don't that you be creative people? To become creative person must prefer to read a book. Merely choose the best book that suited with your aim. Don't always be doubt to change your life at this book Biopunk: Solving

Biotech's Biggest Problems in Kitchens and Garages. You can more desirable than now.
