Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1)

Cleo Borac, Silviu Borac

2nd Edition - 2014

About “Competitive Mathematics for Gifted Students” This series provides practice materials and short theory reminders for students who aim to excel at problem solving. Material is introduced in a structured manner: each new concept is followed by a problem set that explores the content in detail. Each book ends with a problem set that reviews both concepts presented in the current volume and related topics from previous volumes. The series forms a learning continuum that explores strategies specific to competitive mathematics in depth and breadth. Full solutions explain both reasoning and execution. Often, several solutions are contrasted. The problem selection emphasizes comprehension, critical thinking, observation, and avoiding repetitive and mechanical procedures. Ready to participate in a math competition such as MOEMS, Math Kangaroo in USA, or Noetic Math? This series will open the doors to consistent performance.

About Level 1 This level of the series is designed for students who know addition and subtraction with multi-digit numbers as well as simple multiplications of one-digit numbers. Some of the problems, however, involve advanced concepts and may be useful for older students.

About Volume 1 - Counting This book starts a foundation for good skills for discrete counting and probability. Age appropriate examples introduce elementary counting concepts and inductive reasoning. We focus on establishing a solid strategy for each problem, even when using a brute force solution, such as listing all possibilities, is an option. Similar problem statements with strikingly different solutions familiarize the student with the subtle details in wording that can make counting problems difficult.

From reader reviews:

Tara Carlson:

The book Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1) can give more knowledge and information about everything you want. Exactly why must we leave a good thing like a book Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1)? Several of you have a different opinion about guide. But one aim in which book can give many information for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or information that you take for that, you can give for each other; you are able to share all of these. Book Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1) has simple shape nevertheless, you know: it has great and large function for you. You can appear the enormous world by open up and read a guide. So it is very wonderful.

Julie Kappel:

Hey guys, do you would like to finds a new book to study? May be the book with the name Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1) suitable to you? Typically the book was written by popular writer in this era. Typically the book untitled Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1) is the main one of several books which everyone read now. This particular book was inspired lots of people in the world. When you read this book you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, therefore all of people can easily to comprehend the core of this e-book. This book will give you a wide range of information about this world now. So you can see the represented of the world in this particular book.

Joseph Gabriel:

Many people spending their time by playing outside together with friends, fun activity having family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading through a book. Ugh, do you consider reading a book really can hard because you have to accept the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Smart phone. Like Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1) which is getting the e-book version. So , try out this book? Let's notice.

James Wood:

Within this era which is the greater man or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple method to have that. What you have to do is just spending your time not very much but quite enough to have a look at some books. One of several books in the top checklist in your reading list is Practice Counting: Level 1 (ages 7 to 9) (Competitive Mathematics for Gifted Students) (Volume 1). This book which is qualified as The Hungry Hills can get you closer in

getting precious person. By looking upward and review this e-book you can get many advantages.
